

South Dakota Five-Year Capital Expenditure Plan

Bureau of Finance and Management

January 2026

South Dakota Five-Year Capital Expenditure Plan - Introduction

Governor Larry Rhoden remains committed to strengthening and building on a long-standing foundation of fiscal responsibility. The state's commitment to stability and transparency is reflected in the formalization of long-term financial planning practices, established through Executive Order 2014-06 and state law. In accordance with these directives, the Bureau of Finance and Management provides three key financial planning documents to the Governor by no later than January 10 of each year.

As outlined in Section 2 of the Executive Order, the South Dakota Five-Year Capital Expenditure Plan provides *“a capital expenditure plan outlining projected expenses for construction projects as well as maintenance and repair projects for the next five years. The plan will address cost projections as well as fund sources used to finance the construction and maintenance and repair projects.”*

We are pleased to submit this report, which includes a current listing of capital projects being considered from FY2026 to FY2030. The list breaks down projects into three main categories – New Construction, Expansion, and Maintenance and Repair. This capital plan presents the agency, the location, the project, and the estimated fiscal year in which the project will be completed. In addition, the financial plan presents a projection for funding sources and costs of each project. The projects and costs on this list are as of January 2026 and are subject to change as needs are further evaluated and more in-depth studies and engineering assessments occur.

Our hope is the information presented in the South Dakota Five-Year Capital Plan sets forth a clear plan of the state's capital needs and a better understanding of South Dakota's budget while further strengthening our state's financial practices.

Sincerely,

Jim Terwilliger
Commissioner
Bureau of Finance and Management

South Dakota Five-Year Capital Expenditure Plan – Project Information

The following pages provide a brief description of some of the projects listed on the South Dakota Five-Year Capital Expenditure Plan. The potential projects included are classified as either "New Construction" or "Expansion" projects. The details listed for the briefing of each potential project will add awareness and understanding as to the need and scope of each project. Projects classified as "Maintenance and Repair" are not discussed in further detail as they are part of the state's normal maintenance and repair operations.

The South Dakota Five-Year Capital Expenditure Plan is comprised of \$8,292,558,644 in total funds. This includes \$219,162,645 in general funds, \$356,469,606 in federal funds, and \$7,716,926,393 in other funds. Following the project information is a table listing the types of projects, total costs, and funding sources of the South Dakota Five-Year Capital Expenditure Plan.

New Construction Projects

Wildland Fire District Fire Stations

Construction of District Fire Stations for Wildland Fire are needed to support state wildland firefighters as they work alongside local and federal partners to protect the Black Hills from wildfires. New District Fire Stations are needed in Rapid City and Hot Springs because current facilities no longer meet the needs of Wildland Fire due to size restrictions and safety concerns.

Northern State University – Lincoln Hall Replacement

This funding will be used to demolish and construct a new facility to replace Lincoln Hall on the campus of Northern State University. The new, state-of-the-art facility will enhance the recruitment, education, and workforce readiness of the students in the NSU School of Business as well as the South Dakota State University Accelerated Nursing program, which will now be housed in this building. This project will be funded with ARPA Capital Project Funds.

South Dakota Women's Prison – Rapid City Facility

The inmate population has grown at the South Dakota Women's Prison, and the housing facility has expanded from the original design in 1997. This project is set to construct a new 300-bed facility to house low and medium security females in Rapid City.

Dakota State University – Applied Research Center

The construction of a new Applied Research Center in Sioux Falls will be used to significantly advance the university's applied research capabilities and provide the foundation for a new industry in the state. The new applied research lab will be constructed using private donations and contributions.

Watertown Vehicle Maintenance Shop

The Watertown Vehicle Maintenance Shop will be a 50,000 square foot facility with maintenance bays, a wash bay, tool rooms, cold storage, as well as administrative and training space. The new building will help maintain National Guard equipment and will be designed to accommodate the size of the larger vehicles currently being utilized by the National Guard.

Mitchell Technical College – Energy Field Underground Building

This project will construct a new indoor lab space for students in the powerline construction and maintenance program. This building will operate equipment associated with underground electrical infrastructure and allow students to be taught the skills inside in a controlled environment and implement the skills outside in real world conditions.

Sturgis Vehicle Maintenance Shop

The Sturgis Vehicle Maintenance Shop will be a 37,019 square foot facility with maintenance bays, a wash bay, tool rooms, cold storage, as well as administrative and training space. The new building will help maintain National Guard equipment. This facility will be designed to accommodate the size of the larger vehicles currently being utilized by the National Guard.

Southeast Technical College - Center for Advanced Manufacturing

This project will construct a new Center for Advanced Manufacturing on the campus of Southeast Technical college. This building will increase overall student capacity and house state-of-the-art labs, classrooms, and collaboratives spaces to support a variety of academic programs, such as Advanced Manufacturing Maintenance Technology, Advanced Manufacturing Automation Technology, Mechanical Engineering Technology, and Welding programs.

South Dakota State Penitentiary - Facility

The inmate population has grown at the South Dakota State Penitentiary, and the housing facility has expanded from its original design. This project would construct a new 1,500-bed correctional facility for males in Sioux Falls.

Department of Transportation - Maintenance Shops

The Department of Transportation (DOT) has plans in the next five years to update, construct, or replace maintenance shops throughout the state. Maintenance shops being considered would increase capacity, replace outdated facilities, and provide new facilities, all while complying with Americans with Disabilities Act (ADA) standards. The new facilities being considered would allow DOT employees to house vehicles, equipment, and other necessary items helping to lengthen the lifespan of these items, which may decrease future expenditures.

Game, Fish, and Parks - Statewide Recreational Enhancements

The Department of Game, Fish and Parks continually works toward the enhancement of statewide recreational areas and state-owned properties for the use and enjoyment by residents and visitors with a focus on public access to outdoor recreational opportunities. The new construction projects planned over the next several years include trail projects, day use facility upgrades, utility upgrades, shooting and archery

range enhancements, fishing access, Americans with Disabilities Act (ADA) compliance upgrades, playground equipment, camping cabins, storage buildings, and road projects.

Expansion Projects

SD Public Health Lab Expansion and Remodel

This project will construct a new Public Health Laboratory Building and renovate the existing laboratory facility to support the co-location of the Department of Health programs that are currently located throughout Pierre. This project will be funded with state general funds and ARPA Capital Project Funds.

South Dakota Women's Prison - Healthcare Improvements

This project will expand the medical services area within the main building at the Women's Prison in Pierre. The existing medical area serves more than three times the number of inmates for which it was originally designed. In addition, a separate housing unit for offenders with mental health needs will be added.

Pierre Minimum Center Demolition

Due to the construction of a new 300-bed facility to house low and medium security females in Rapid City, the existing Pierre Minimum Center will be demolished after all offenders have been relocated.

Black Hills State University – West River Nursing Renovation and Expansion

This project will address and support the severe nursing shortage in South Dakota, particularly West River, by renovating and expanding the West River Health Science Center at Black Hills State University – Rapid City. The expansion of the Health Science Center will increase nursing cohort size and make all nursing education available at one Rapid City site. This will increase classroom space, support facilities, and add resources for specialized simulation and skills laboratories. This project will be funded with ARPA Capital Project Funds.

South Dakota State University - Larson Commons Renovation

Renovated spaces will enhance the student experience by updating the dining facilities to a modern layout. Updates to the building will also improve infrastructure that has not been updated since the construction of the facility.

South Dakota School of Mines and Technology - Surbeck Center Expansion

This project will provide a consolidated location for student services. Services include the counseling center and student resources centers. Additional space will be used to host meetings, conferences, and other campus events.

South Dakota State University - Cottonwood Range and Livestock Field Station

State general funds appropriated during the 2022 legislative session, via SB 84, will allow South Dakota State University to design and renovate the Cottonwood Range and Livestock Station. This renovation will bring the facility to the forefront of industry research while also providing education to ranchers and rangeland managers.

Mitchell Technical College – Energy Training Center Addition

This project will expand the existing energy training center at Mitchell Technical College to add two additional indoor lab spaces for the powerline construction and maintenance program, as well as the electrical utilities and substation program. This will allow students to be taught the skills inside in a controlled environment and implement the skills outside in real world conditions.

Sturgis Readiness Center

This expansion will add approximately 6,550 square feet to the current facility while updating the HVAC and electrical systems. The new addition conjoins readiness centers in Spearfish, Belle Fourche, and Sturgis. The facility will improve administration, classroom, latrine, and shower space available. This project requires a 25% state match.

South Dakota State University – The Barn Renovation

This renovation project will modernize “The Barn” at South Dakota State University. The plans include improved teaching and research spaces for the Department of Health and Nutritional Sciences.

Cultural Heritage Center Renovation

This project will provide an improved visitor experience in the museum at the Cultural Heritage Center, ensure the integrity of significant artifacts and records, and provide enhanced educational programming for future generations. Foundational to the renovation will be improvements to the building's site and structure. These updates will include improved access for individuals with disabilities, as well as school and tour buses. Increased storage space, particularly for the state archives and South Dakota Historical Society Press, will also be made available through the updates.

South Dakota State University – Stanley J Marshall Center Addition

The expansion of the Stanley J Marshall Center includes practice facilities for women's basketball, men's basketball, and wrestling. The addition will provide more flexibility in scheduling practices for all sports and allow the overall facility to function more efficiently.

ARPA Environmental Funding Projects

These projects will utilize one-time ARPA funding to support eligible water and sewer infrastructure improvements in state-owned facilities. This funding will boost both transformational and core infrastructure projects across the state. State agencies have proposed over 125 projects, which will have long lasting benefits for future generations.

Department of Transportation - Maintenance Shops

The Department of Transportation (DOT) plans to update, construct, or replace maintenance shops throughout the state in the next five years. Maintenance shops being considered would increase capacity, replace outdated facilities, and provide new facilities, all while complying with Americans with Disabilities Act (ADA) standards. The new facilities being considered would allow DOT employees to house vehicles, equipment, and other necessary items and would also to help lengthen the lifespan of these items, which may decrease future expenditures.

Department of Transportation - Facilities

Additional space is needed statewide within the Department of Transportation. Over the next five years, plans for expanded buildings would provide adequate space for office space, lab space, salt storage, cold storage, seasonal equipment, and heated truck storage.

Department of Transportation - Railroad Improvements

The Department of Transportation (DOT) has a plan to address a wide range of rail-related issues over the next 5 years. These include the State's freight and passenger rail goals, an inventory of existing rail infrastructure, and analysis of economic, safety, and environmental impacts.

South Dakota Five-Year Capital Expenditure Plan Summary

The tables below summarize all South Dakota Five-Year Capital Expenditure Plan projects.

New Construction				
	General Funds	Federal Funds	Other Funds	Total Funds
Continued Safety	3,925,058	61,400,000	734,700,000	800,025,058
